SCHULZ

Let's tip some sacred cows!

#PrDcDeliver

@AdamYuret

You're crazy

Scrum Is:

1. Installing Jira
2. Writing a billion user stories
3. Answering the same three questions every day until somebody dies.

#Estimates

#NOESTIMATES!

#KnowEstimates

Single Feature Forecaster

4/20/16

Stories are remaining to be completed?
 (estimate of stories. Tip: start wide and narrow as certainty increases)

Low guess Highest guess

When split before and whilst being worked on. Estimate the split rate low and high bounds.
 (throughput in the backlog is pre-split, but captured throughput post-split. Adjust for this here)

Low guess Highest guess

How many completed stories per week or sprint do you estimate low and high bounds?

Estimate/samples are per days

Throughput data **OR** enter a low and high estimate below. Use:

Low guess Highest guess

Velocity rather than throughput?
 To have estimates in story points, then you can sum all of the estimates and use that for input 4. The benefit of using throughput (count of stories per week/sprint) is that the individual stories don't require estimation in story points.

Enter data in Orange cells

“Agile”

Currently, the best Scrum Teams in the world average 750% gains over the velocity of waterfall Teams with much higher quality, customer satisfaction, and developer experience. We have worked directly with projects in the U.S. [3], Russia [4], the Netherlands and India [5], and compared results with Software Productivity Research data on agile Teams [5]. Capers Jones data has been almost exactly equivalent to ours giving us significant confidence in our findings. The problem addressed in this paper is that over 90% of Scrum Teams never deliver the capability seen in most of our teams and Capers Jones teams [6].

Focus on Compliance to the Framework Over Value

#PrDcDeliver

WAT?!

@AdamYuret

A person wearing a hard hat and dark clothing stands on the deck of a ship at night. They are looking out over a body of water where a massive, intense fire is burning, with large plumes of orange and yellow flames rising into the dark sky. The ship's deck has a safety net and some lights visible in the foreground.

A scarecrow with a human-like face, wearing a dark hat with a wooden block on top and a green tunic with a straw collar. A crow is perched on its outstretched right arm. The background is a bright, hazy sky over a field of yellow-green plants.

Agile Doesn't Have a Brain

PRODUCT OWNER

#PrDcDeliver

@AdamYuret

Product Owner

or

Divisive metaphors

Abusive blaming

Single Wringable Neck

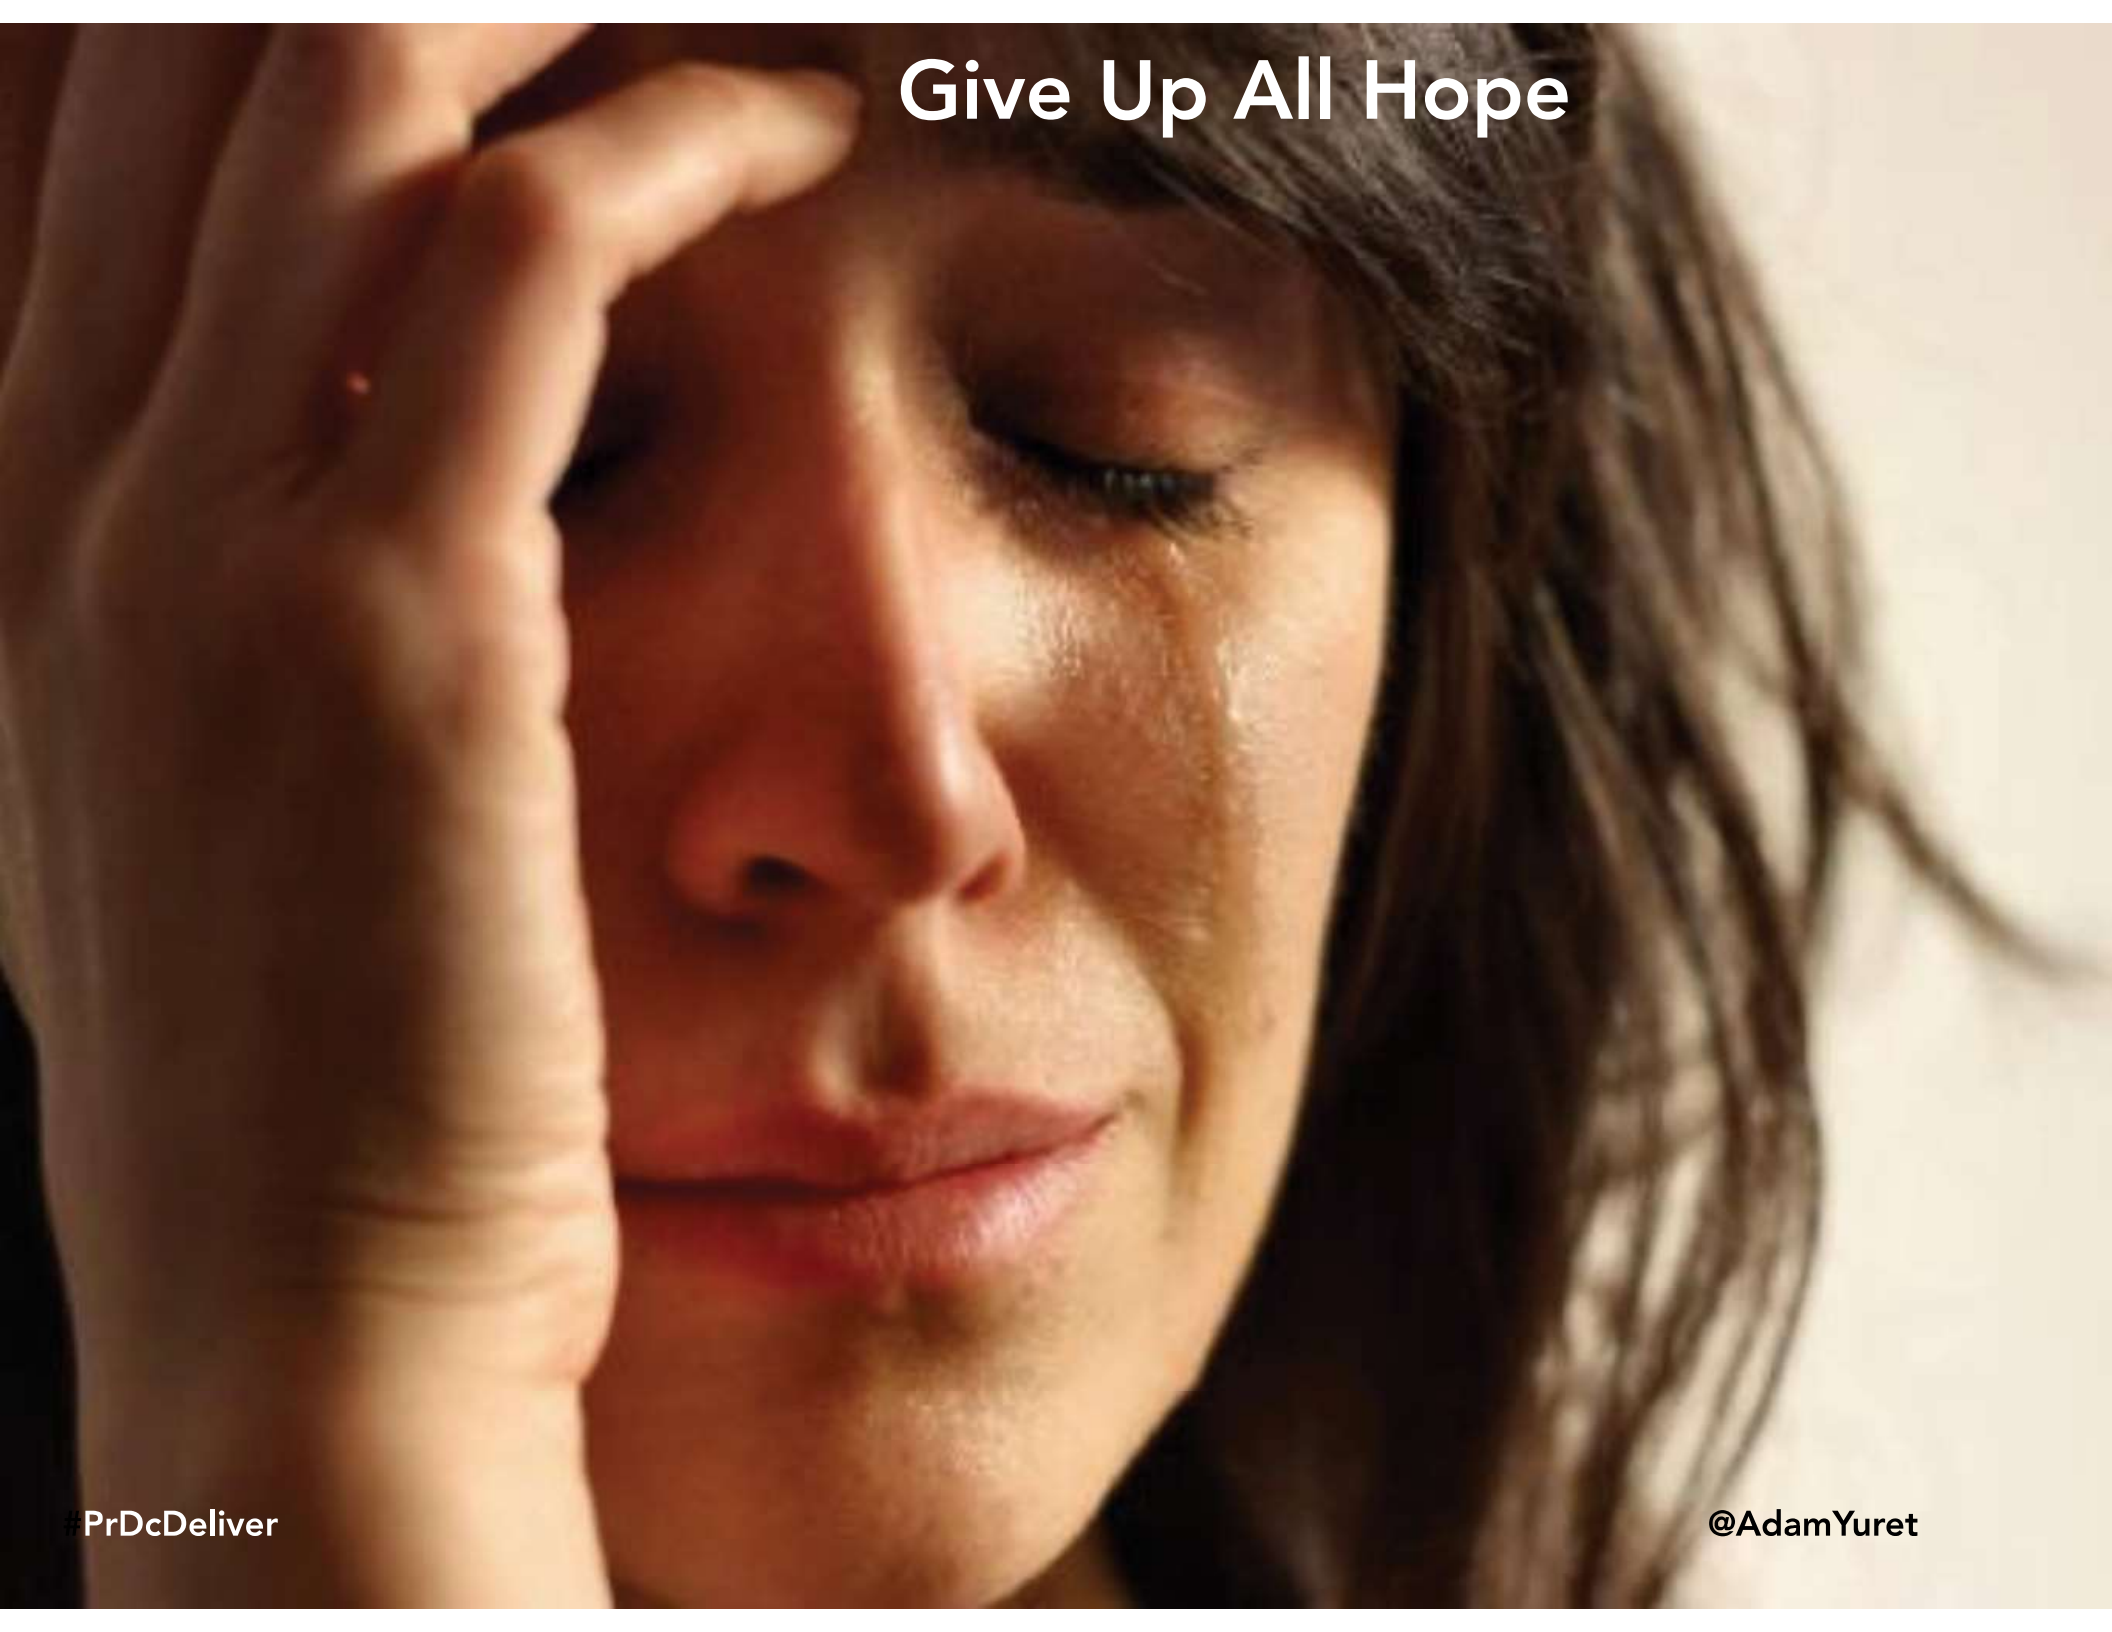

These approaches typically make things worse!

"It is common for big orgs to adopt Agile, but see no financial benefits. Why? Development is faster, but that has no bearing on 1) making the right product decisions, and 2) working to realize benefits. The whole POINT of Agile is to reduce risk. In project work, that risk is "on time / within scope". In product work, that risk is "this thing doesn't **ing work". This is the whole fallacy of the PO "accepting" delivery of a feature. No benefit have been delivered!"**

A close-up photograph of a woman with her eyes closed and her hand resting on her forehead. The lighting is dramatic, with strong highlights and deep shadows, emphasizing her facial features and the texture of her hair. The overall mood is one of despair or hopelessness.

Give Up All Hope

STRATEGY

“A high level plan to achieve one or more goals under conditions of uncertainty. ” -Wikipedia

Product Strategy is a system,
made up of visions, goals,
constraints, and where we are
now that results in desired
business and customer outcomes.

HOW NOT TO DO STRATEGY DEPLOYMENT EFFECTIVELY

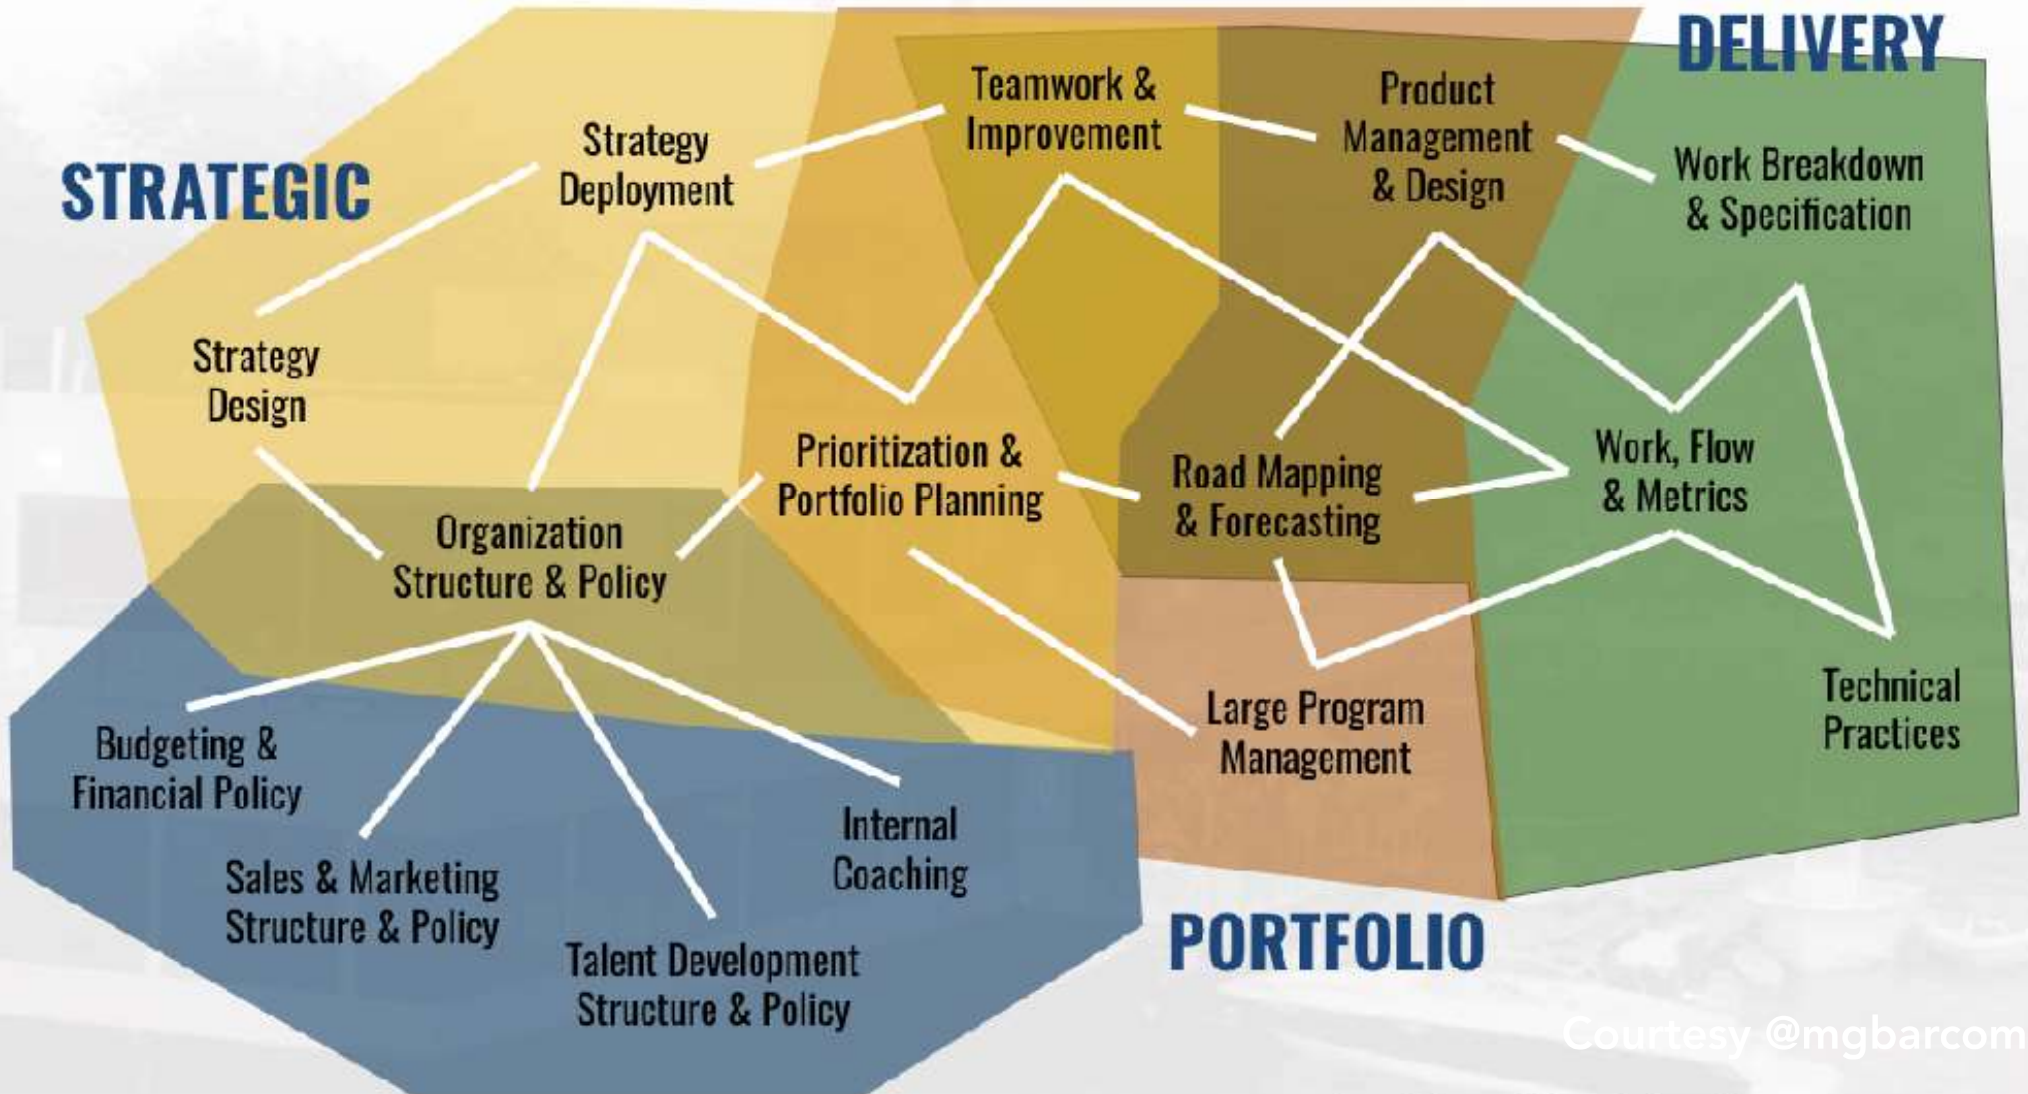

Fork me on GitHub

Our strategy is agile. We will lead a secure effort of the market through our use of revolution and social media to build a competitive advantage. By being both cloud based and innovative, our collaborative approach will drive ecosystem throughout the organization. Synergies between our insight from data and digital business will enable us to capture the upside by becoming customer focused in a digital first world. These transformations combined with learning organization due to our leaders will create a blockchain through internet of things and data leaders.

Baloney Detection Kit

1. Seek Independent Confirmation of "facts".
2. Encourage debate on the evidence.
3. "Authority" carries no weight in argument.
4. Consider multiple working hypotheses.
5. Don't get overly attached to a hypothesis because it's yours.
6. Quantify wherever possible.
7. Every link in a chain of argument *must* work!
8. Occam's Razor
9. Always ask if the hypothesis can be falsified

Summary

Agile (as commonly practiced) is solving the wrong problem for the wrong people.

Where there is no urgency there is inertia that is hard to overcome.

Markets care less about how we do things than what we deliver.

If you can influence organizational design and strategy deployment, doing so will reap large rewards.

If you cannot influence the big picture, act locally, but only with the big picture in mind.

Thank You!
